

Year 6 Maths Objectives

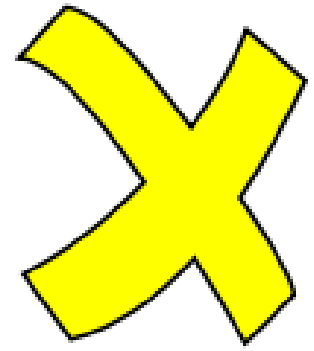

Number: Ratio

- I can use ratio language
- I can use ratio and fractions
- I can understand the ratio symbol
- I can calculate ratio
- I can use scale factors
- I can calculate scale factors
- I can solve ratio and proportion problems

Statistics

- I can read and interpret line graphs
- I can draw line graphs
- Use line graphs to solve problems
- I can work with circles
- I can read and interpret pie charts
- I can read pie charts with percentages
- I can draw pie charts
- I can calculate the mean

Properties of Shape

- I can measure with a protractor
- I can recap draw lines and angles accurately
- I can recap my learning associated with angles on a straight line
- I can recap angles around a point
- I can calculate angles
- I can work with vertically opposite angles
- I can calculate angles in a triangle
- I can calculate angles in a triangle - special cases
- I can calculate angles in a triangle with missing angles
- I can find angles in special quadrilaterals
- I can find angles in regular polygons
- I can draw shapes accurately
- I can draw nets of 3-D shapes
